

### Co-curricular activities at Chenderit for the year 2017 - 2087.

Co-curricular activities form an essential element of the curriculum offer at Chenderit School. Participation in co-curricular activities is not only a means to demonstrate the independent learning skills valued by universities and employers, but also offers individual students an opportunity to develop their own interests and enthusiasms. In addition, the range of activities offered supports students' interest in specific subjects, and develops their awareness of the wider academic community of which they are a part and to which they make such an important contribution.
